WE'VE GOT
THE PERFECT TORQUE
BOLTED DOWN.

Snap-on creates the tools that allow you to apply the perfect amount of torque every time. And when you know you're delivering precisely the right torque, it takes a huge weight off your shoulders. As the industry leader in torque tools and selection, Snap-on helps you keep planes in the air, trucks on the road, heavy equipment operating, and more. From our Mechanical Torque Wrenches to our advanced ControlTech® Electronic Torque Wrenches as well as our pneumatic and hydraulic solutions, we deliver the torque that sets the standard. And for more information on the calibration services and training we offer, talk to your Snap-on representative.

Looking for Torque?
Go to page 275 to view our entire Torque selection.

TOOL CONTROL

TOOL CONTROL THAT PUTS YOU IN COMMAND.

For technicians, lost tools can kill a productive workday with wasted time. That's why Snap-on has kept technicians organized and productive since 1920. Now, nearly 100 years later, Snap-on offers the most advanced form of tool control in the industry: Level 5 Tool Control. From seamlessly integrated access control to fully automated systems that automatically monitor who has which tools and where they're working, Level 5 improves every aspect of tool management. And it works with your crew, at the speed of work, to decrease downtime and improve productivity. That way everyone can concentrate on what matters most – the job at hand.

Level 5 tool control is tilting the playing field.

ORGANIZATION
The more organized you are, the easier it is to get the job done right. Starting with a complete tool audit conducted by a Snap-on Solutioneer, we'll help you determine the level of tool control you need and design a specialized tool set with your specific applications in mind.

VISIBILITY
Finding the right tool for the job can take time—even more so if they're hard to see. Our visibility solutions decrease the time to know the tool is missing and find tools you need. Our selection of high-visibility tool handles, custom color foam inserts, toolbox organizers, and pegboards don't just raise the visibility of your tools, they raise the productivity of your team.

ACCESS CONTROL
Don't get locked in to using keys that can be lost or shared. Our tool storage units have Keyless Access Control, which means your teams have access to just the tools they need. You can configure the tool control to work with HID proximity badges, magnetic strip cards, barcodes, or PINs. And with our proprietary software, you can control access from one system, or from your network. With our Access Control, you can keep productivity up while keeping unauthorized users out.

ASSET MANAGEMENT
What if you could keep track of your key assets all from one place? With Level 5 software system, you can. It provides full reports on everything you want to keep tabs on. It'll even update you when a tool needs to be restocked or ordered. Our solution is designed to preserve your assets and your sanity.

AUTOMATION
When you minimize human error, you minimize FOD and FME, and maximize productivity. Our Automated Tool Control handles all tool control and tracking automatically. Whether it's by digitally scanning every drawer or by using RFID tags to track large equipment, our systems notice which tools have been removed or added, and track each tool by part number and user. So you can keep an eye on your productivity, without getting in the way of getting the job done.

SPECIALIZED TOOL SETS

Small Arms Repairman Tool Kit
SARTK2012
- Designed for bench and field repair of small armaments
- This kit offers maximum durability and mobility and can be deployable by a single maintainer
- Each removable drawer has customized foam inserts for tool control (as applicable for the purpose described, all materials meet Mil Specs AA-59315 and AA-59316)
- The tools and equipment are placed in an all-weather impact resistant mobile tool storage case (18"h x 24"w x 15"d)
  - Case material made with Zerust® corrosion inhibitor to help prevent tools from rusting
  - Telescoping trolley handle (36", 39" & 43")
  - Loaded drawers extend fully so entire contents of drawer can be easily viewed
  - Can open lid without having to flip the box over on its side
  - Meets/exceeds MIL810 & MIL1916
  - Service parts available
- 120 lbs. fully loaded which requires a two-person lift
- ALWAYS use safety glasses (GLASS20BK included in kit)

USPS Tool Sets from Snap-on Industrial

Snap-on Industrial now offers USPS Vehicle Maintenance Facilities the finest tool sets available in the industry. Featuring Snap-on® and Williams® branded products, these sets offer USPS repair facilities unprecendented quality, versatility, warranty, and service options. The optional foam tool inventory control system makes keeping track of tools easy and convenient, reducing tool loss and increasing productivity.

Developed exclusively for the needs of USPS vehicle repair facilities, this set represents the full Certified USPS Maintenance Tool Set.

Available as four components to suit each facility's unique needs:

Stock No.	Description
USPSTS-1	244 Piece Tool Set Only
KRA4114FPBO	4 Drawer Top Chest
KRA4107FPBO	7 Drawer Roll Cabinet
USPSTCF-1	Tool Control Foam Kit

This Set Contains a Full Assortment Of:

- Sockets
- Wrenches
- Screwdrivers
- Hammers
- Chisels
- Pliers
- Tool Storage Chests and Cabinets
- C-Clamps
- Scrapers
- Locking Pliers
- Snap-ring Pliers
- Hex Keys
- Specialty Tools
- and more...

Snap-on Power and Hand Tools

Snap-on offers the most complete assortment of power and hand tools in the industry. The company that invented the original socket and ratchet in 1920 now brings you everything necessary to repair a motorized vehicle in the 21st century.

Products include:

- Hand Tools
- Pneumatic and electric power tools
- Torque wrenches & calibration systems
- Automotive specialty tools
- Jacks and hydraulic equipment
- Pullers
- Engine diagnostic analyzers
- Charging and starting system testers
- Tire changers
- Brake lathes and testers
- Antifreeze recycling systems
- and much more...

Snap-on Foam Tool Control Systems

Tool Control from Snap-on Industrial is the most sophisticated and comprehensive Tool Control System in the world. From stationary installations to portable tool boxes in road service vehicles, Snap-on offers solutions for every application. Our optional foam tool control system allows the USPS tool set to be custom fit into the tool boxes. Includes foam panels, with a form-fit cutout for each tool in the set.

Contents subject to change. Consult your Snap-on Industrial Account Manager for up-to-date set contents.

SET BUILDING

U.S. Sets

An Unequaled Opportunity

When we introduced our set building program it revolutionized the industry — for the first time there was a planned way to expand tool sets as work and responsibilities evolved and grew. It is designed to provide the most used tools in the most likely progression. And as metric tools became the standard in the industry, we began offering a greatly expanded metric selection with a master set that tops anything else available. Ask your Snap-on® Industrial Account Manager for more information on how you can build exactly the right tool set for your specific needs.

How the Program Works

If you're building a set from the ground up, start with our 9100GSBO Apprentice Set. It includes a balanced selection of 1/4", 3/8" and 1/2" square drive tools, wrenches, screwdrivers, pliers, punches and chisels — a basic set for routine maintenance. We've also put increased emphasis on getting you all the metric tools you need, as they are increasingly becoming the standard in many industries.

When your needs grow, the second tool group provides more than 100 additional standard and specialty tools for more advanced work. Each new tool group offers recommendations on the appropriate storage chests and cabinets to help you stay organized and productive. Through this method of steady, planned expansion, you can continue building your tool set until you've achieved the ultimate selection of matched hand tools and storage units.

9100GSBO

U.S. Apprentice Set

9100GSBO Complete Apprentice Set.

Intermediate Sets
(in blue over yellow tool control foam)

We offer many choices so you can find the system that best fits your exact needs.
Choose from a variety of ideas:

- Complete Tool Sets
- Tool Control Systems
- Tool Control Foam Inserts
- Portable Tool Control Systems
- High Visibility Tools
- Silhouetted Tool Boards
- Wall Cabinets
- Tool Cabinet Accessories

9200 Set in KRA4059 Tool Chest (US Set 2)

9600GSO Set in KRL791APBO Tool Chest and KRL722BPBO Roll Cab (U.S. Set 6)

Apprentice Set

Includes more than 100 pieces with complete Tool Control Foam System.

Stock No.	Description
KRA2055FPBO	Snap-on Top Chest
9100GSO	9100 - Tools Only
VF9100GSB-UY	9100 - Foam Only (Blue over Yellow)

Complete Set 2

Includes more than 200 pieces with complete Tool Control Foam System.

Stock No.	Description
KRA4059FPBO	Snap-on Top Chest
9200AGSO	9200 - Tools Only
VF9200GSB-UY	9200 - Foam Only (Blue over Yellow)

Complete Set 3

Includes more than 300 pieces with complete Tool Control Foam System.

Stock No.	Description
KRA4059FPBO	Snap-on Top Chest
KRA4008FPBO	Snap-on Roll Cab
9300GSOFPBO	9300 - Tools Only
VF9300GSB-UY	9300 - Foam Only (Blue over Yellow)

Complete Set 4

Includes more than 600 pieces with complete Tool Control Foam System.

Stock No.	Description
KRL751PBO	Snap-on Top Chest
KRL756CPBO	Snap-on Roll Cab
9400GSO	9400 - Tools Only
VF9400GSB-UY	9400 - Foam Only (Blue over Yellow)

Complete Set 5

Includes more than 800 pieces, with complete Tool Control Foam System.

Stock No.	Description
KRL751PBO	Snap-on Top Chest
KRL756CPBO	Snap-on Roll Cab
9500GSO	9500 - Tools Only
VF9500GSB-UY	9500 - Foam Only (Blue over Yellow)

Complete Set 6

Includes more than 1000 pieces with complete Tool Control Foam System.

Stock No.	Description
KRL791APBO	Snap-on Top Chest
KRL722BPBO	Snap-on Roll Cab
9600GSO	9600 - Tools Only
VF9600GSB-UY	9600 - Foam Only (Blue over Yellow)

Shown:
- Blue Over Yellow (-UY)

Other Foam Colors Available:
- Yellow Over Red (-YR)
- Black Over Red (-BR)
- Black Over Yellow (-BY)

FLEXIBLE. SCALABLE. INVALUABLE.

From one-of-a-kind kits to thousands of identical tools sets, no one does tool kitting like Snap-on. No matter how big or small the application, Snap-on's robust, flexible and scalable capabilities enable us to create a plethora of kitting solutions – from stationary, mobile and transportable sets, to fully-outfitted shipping containers, and much more. No job is too big or too small, as we supply kits for everything from servicing copy machines, to maintaining and repairing tanks, helicopters, oil rigs and jumbo jets. Standard or custom, large or small – from our state-of-the-art kitting center, Snap-on does it all.

Our five-star approach to tool kitting.

ORGANIZATION
Tons of options for organizing tools: bags, shadow boards, tool silhouette decals, foam inserts for portable cases, custom foam layouts for tool box drawers, and more. When you're highly organized, you're highly productive.

TOOL MANAGEMENT
Management follows organization. Whether you require simple visual management, or a program to meet FOD and FME requirements, we can tailor a management program for virtually any need with our Level 5 Tool Control offering.

SOURCING AND INTEGRATION
Need a tool that requires additional sourcing beyond our standard offerings? No problem. We can do the sourcing for you, and integrate the components into your kit.

TOOL IDENTIFICATION
At Snap-on, we have in-house laser tool engraving capabilities to match your identification system – whether you're looking for etching for a specific kit, or serially marked tools.

ON-SITE TOOL MANAGEMENT
Sometimes you need someone to actually go on-site, check inventories, manage updates, and handle replacements. Snap-on is ready to assist you with all your tool needs.

Looking for tool kitting?
Contact your Account Manager
or call 1.877.740.1900

TOOL KITTING

LEVEL5
Tool Control System™

NOW YOU CAN CLEARLY SEE WHERE YOUR TOOLS ARE

The Snap-on Visual Control Cabinet features a clear, abrasion-resistant polycarbonate window that gives you a full view of your tools for instant accountability and inventory management. Available in 2 sizes, this cabinet can hold up to 100 tools securely with keyed or keyless entry. With an optional rolling cart or rolling cab, you can position the Visual Control Cabinet close to the work so your technicians always have the right tools ready to use.

FEATURES AND BENEFITS

PERFORMANCE
- Visually manage tools at the "Point of Use"
- Available in 34" and 49" sizes for a tool capacity of 70 to 100 tools
- VCC keeps tools chest high – within the "strike zone" – reducing the need to bend and stretch for tools
- Full swing door hinge creates unobstructed entry while gas shocks keep the window in the upright position

SECURITY
- Makrolon® AR Polycarbonate window – the same material used in jet fighter cockpits – for "at a glance" tool management and tool security
- Available with standard key locks or eLock keyless entry for maximum security without the need to distribute keys
- e-Lock is programmable for up to 3,000 users and can be networked with LockView® software

VERSATILITY
- Includes v-stand brackets with three versatile mounting options:
  1. Mount to a wall using the predrilled, 16" on center holes
  2. Mount to an optional 49" rolling cart using the predrilled holes and included hardware
  3. Mount to any 24" deep or larger roll cab using the predrilled holes and included hardware
- Interior tool control options include metal peg board or customized foam layouts
- Available in 5 color selections and Stainless Steel so you can organize by area, application or types of tools
- The paint-free stainless steel models are designed for clean room applications and feature an easy-to-clean surface

Shown with optional foam insert and rolling cart

HOW TO ORDER

1. Select the desired box with v-stand in either 49" or 34", keyed or keyless, and a color option from VCC models.

2. Select interior tool control option, foam cut outs or metal peg board, from optional accessories

3. Select an optional rolling cart from optional accessories*

4. Add LockView® software for networking keyless boxes (one copy per administrator, not per box)

*KRA2400 series roll cab are also viable options.

BULK TOOL STORAGE

MAXIMUM SECURITY
Also with Access Control

FEATURES AND BENEFITS

"At-a-Glance" Storage

- With a durable chrome finish and open cage design, it's easy to take inventory of your valubles from any vantage point—without ever entering the cage.

Controlled Security

- The cage features a keyless entry system and a secondary door handle that latches at top and bottom so you can control access to the cage. A convenient padlock security loop allows for easy audit control.

Keyless Entry System

- The Snap-on Keyless Entry System allows for entry with badge or via keypad with at-the-box programming for up to 3,000 users. The system can be networked with LockView® software.

Easy Access

- Double doors open to a full 270 degrees for easy access and an unbustructed view of the entire interior.

Storage Versitility

- The roomy interior features three shelves to securely store portable tools, assembly parts or project components.

Portable or Stationary

- Model L5BSCGP2460 features heavy-duty casters that swivel and lock for easy mobility, while model L5BSCGP2460S is designed to stay put.

![ACCESS CONTROL]

LEVEL5
Tool Control System™

Snap-on's system secures your tool box, allowing you to control who has access to its contents. No keys to lose or share - your choice of access method:

Keypad PIN entry - Proximity ID card

Administrative access at the unit or through remote software lets you add and delete up to 3,000 authorized users, display an audit trail of past access, and more!

Level 5™ LockView® Features
• Eliminate the hassle of keys to open tool boxes
• Battery power makes ideal for environments where
  tool boxes are on the move
• Powered by 6 D-cell batteries (not included) or power cord
  - Single set of batteries can last up to six months
    depending upon environment
• Grants access to tool boxes with two access methods,
  Proximity ID card and/or keypad PIN entry
• Access with single credential or dual credential:
  card plus PIN for example
• Access unit sits on top of the box and comes
  pre-assembled –all you need to do is put in the batteries
  and set up access credentials
• LED lights indicate if box is opened or closed
• At the box programming
• Last access indicator

Accessories:
L5LVSG4 – Administrative Software
• Allows boxes to be connected to a laptop
  via USB cable
• See historical logs for box access
• Manage box settings
• Manage box user settings and access rights
• Manage groups of users
• Prevent "jackpot" access by locking out
  boxes after a number of access attempts
L5KTCPS – Replacement AC Power Supply

Retrofit Kits:
Existing boxes may be retrofitted modules.
Each kit contains detailed instructions and box
modification templates.
L5KRAPG3 – Standard HID proximity
              card and keypad access

ACCESS CONTROL

LEVEL5™
Tool Control System

Keyless Entry Features

- Access by time, user and date
- How long the user was in the box
- Records unauthorized access attempts by date, time and user
- It records the date, time, and user who performed a physical or visual inventory with findings
- Network-ready with your choice of Ethernet or wireless

- Works with your existing badge system or HID
- Connects to other boxes with slave units to create customized workstations
- Intuitive wizard - driven software provides centralized control for all boxes

Additional Keyless Entry Features:

Power
- 12 V rechargeable battery for extended portability
- Battery level (fuel) gauge in LCD screen
- Messages alert users to recharge
- Indicates charging mode: plugged in, fast-charge or standby mode

Multi-Function Buttons
- Allow programming at the box
- View all settings, make changes
- View audit trails
- Record visual or physical inventories
- Add and delete users easily

Networking
- Networking allows easy system management from a central location LCD Screen
- Show date, time, user name, battery and system status

Additional Features
- Programmable auto-relock time
- Auto-relock on box movement for safety
- Drawer ajar alarm
- Programmable alarm system
- System upgradeable to 802.11N
- Supports up to 3,000 active users per box
- At the box programming
- Last access indicator

Technical Support
- Technical Support is provided through your Industrial Account Manager

Level 5™ is offered in eight base unit configurations built on Snap-on KRL Roll Cab platforms. Complete specifications and options are detailed in the following pages.

MASTER SERIES KEYLESS ENTRY

LEVEL 5
Tool Control System
Selection Guide

How to Order

Level 5™ is offered in eight base unit configurations built on Snap-on KRL Roll Cab platforms. For complete specifications, please see the full-line Snap-on Industrial Catalog.

Step 1 Determine the base unit requirement based on footprint, capacity and color from the chart.
Step 2 Choose your Level 5™ access method, either HID Standard or I Class proximity badge reader
Step 3 Choose your networking connections, either Ethernet or wireless.
Step 4 Order 1 copy of Level 5™ software per administrator (usually 1 copy per site).
Step 5 Choose the accessories that you need for your installation.If you plan to add and connect tool chests, drawer sections and side cabinets to create networked workstations, contact your Snap-on Industrial Account Manager or Customer Service Center for information on slave modules and latches.

LEVEL 5™ TCMAX®

ASSET
MANAGEMENT

L5CZEBLB

L5CRECPRT

L4CPWRSCN

L5CHHP1902

Label & Receipt Printers

• **L5CZEBLB** Prints on tamper proof label material that is very difficult to pick off anything. With other labels, once the label starts to peel off, the rest of the label soon follows. This label will only chip and will not peel off. Label costs are rather low, 4 cents per label, and the $3/8$" x 1$1/2$" label is utilized by pocket badges.

• **L5CT23221** $3/8$" Label Tape Roll
  L5CT2231 $1/2$" Label Tape Roll

• **L5CRECPRT** Thermal receipt printer with USB interface, 208 dpi. Barcodes on the receipts expedite the turn-in process at a busy tool crib and can be used on the job to show what tools you should have at this time.

Barcode Scanners

• **L5CPWRSCN** is a wireless barcode scanner, with a keypad on the top and is our most popular scanner. It does NOT do 2-D PDF417 or DataMatrix barcodes, but it is great for all 1-D applications. Keypad on the top allows you to easily enter quantities of items without having to return to the computer keyboard.

• **L5CLS2208** has a six foot USB cable that plugs into the PC or laptop. Works best when all items to be scanned are within 5 feet of the PC.

• **L5CHHP1902** is a wireless 2-D scanner that can read all linear barcodes plus 2-D barcodes like PDF417 and DataMatrix, but NOT on laser engraved chrome plated tools. Great for 2-D labels but does not have a keypad.

Signature Pad

• **L5CS1GPAD** Required to support electronic capture of signature, provide proof of delivery and return by a specified individual.

Level 5 Box Adaptor

• **L5CADA** RS232 adaptor box, cable and USB to RS232 adaptor to connect Level 5 Tool Box to a PC and TCMax for Level 5™ Gen 3 boxes only.

Item may differ from picture   **L5CS1GPAD**

ASSET MANAGEMENT

SS2763

Level 5™ TCMax® is Tool Control Software that talks™, eliminating the need to repeatedly look at the computer screen between barcode scans. It is the fastest, most accurate way to check tools in and out. TCMax can communicate with the Snap-on® Keyless Entry System for the ultimate in positive tool contol. Provides audible and visual verification of items and function. It's easy to use, smart and secure.

L5CHHP6510

The TCMax Mobile Pocket PC

Handle physical inventories quickly and simply. From anywhere in the plant or facility.

- **L5CHHP6510** with a built-in imager for both 1-D and 2-D barcodes. It talks to you just like TCMax on a PC. It's perfect for performing physical inventories of assets or for issuing and turning in items at a remote location.

Text DataMatrix Barcoding.
Higher Security. Broader Flexibility.

- Today's most advanced, most secure barcoding system. Up to nine characters of information encoded in small square or rectangular marks.
- Identify, track and control every tool, instrument and piece of equipment in your inventory. The marks are permanent and can be placed and read on almost any metal or plastic surface – even curved surfaces.
- There is no better way to protect and control your assets and your costs than DataMatrix Barcoding from Snap-on.
- Laser engraving application
- Encode both text and raw data
- Wear and tamper-proof
- Flat and curved surfaces
- Limit of 9 characters for laser marks

TOOL CHITS

Problem: FOD

Foreign Object Debris costs the aerospace industry millions of dollars each year in damage to equipment and personnel.

Solution: Tool Chits

A Personalized Tool Management System
- Tool Chits allow an immediate visual accounting for all tools in a drawer
- Tool Chits promote personal accountability
- Tool Chits are simple to implement and use
- Tool Chits reduce and minimize tool loss
- A Tool Chit program is easy to tie into an existing system
- Custom Tool Chits are available with sequential numbers, employee photos, and your logo

REPAIR TOOL

Ordering Tool Chits Is easy!

1. Send your logo in jpg or bmp format.
2. Send photos in jpg or bmp format with unique file names.
3. Send data for text in an Excel, Access, or comma-delimited ASCII format.

For more information contact your Snap-on Industrial representative.

AUTOMATED TOOL CONTROL

LEVEL5™
Tool Control System

Simple, scalable tool control starts with centralized access control.

Tool control systems control tool shrinkage and replacement cost. They also help reduce lost-tool downtime. In critical industries and applications such as aviation and nuclear power, tool control is an essential step toward eliminating FOD (Foreign Object Damage in aviation) and implementing FME (Foreign Material Exclusion in the power industry). Unlocked and open access tool boxes can result in FOD/FME problems. Snap-on puts you in control with three choices. Our Level 5™ Keyless Entry system (N034-N035) allows you to specify access to boxes, audit when they are used, and manage it all over a network.

Our Level 5™ ATC system provides the simplest and most user-friendly solution for detecting tools issued from and returned to a tool box, providing a critical enhancement to your FOD/FME program. Using advanced digital imaging technology and proprietary software, the tool box automatically keeps track of its inventory by user, and records which tools are removed and replaced, and when.

Level 5™ ATC Advanced technology that makes tracking tools simple.

Level 5™ ATC is a true tool control system. Based on the tool list that you supply, each drawer in the tool box is organized and each tool assigned to a unique space in the foam drawer liner. That information is then programmed into the scanning hardware fitted to the top of the box. As each drawer is opened and closed it is scanned digitally, and the image is instantly compared with the baseline stored image of that drawer. Any tool that has been removed or returned is identified and the computer makes an audible announcement: a tool has been removed or replaced.

Additionally, the computer tracks each tool removed and replaced by its part number and by user, and creates an audit trail in database format. Both the digital images and the data entries are stored for review in an audit trail of the last 15,000 transactions. Not only do you get detailed information, but you have access to the actual pictures of the drawer contents for verification.

Plug and Play vs. Some Assembly Required

Some solutions to FOD and FME problem involve attaching RFID tags, sensors or bar codes to the tools to track them. Additional operations and attachments can create significant additional cost and limitations by:
• Interfering with the normal use of the tool
• Using up additional real estate in the drawers
• Having limited usability on small tools like sockets
• Dislodging and becoming a new source of FOD

Level 5™ ATC Features
• No individual tool scanning required
• No RFID tags to install or replace
• No limitations on tool size—if it fits in the drawer, it works
• Intuitive interface—easy-to-use touchscreen
• Audible voice confirmation of tool removal and replacement
• Automatic locking
• Errors announced and displayed for incorrect tool position or drawer not closed

The Snap-on Level 5™ ATC system is delivered with your predetermined set of tools already installed in one of two basic platforms, the KRL1056 36" framework, or the KRL1021 54" framework. Each is offered in eleven color choices, three different drawer configuration options, with and without casters, and in 110V or 230V European power options.
To order, work with your Snap-on Industrial Account Manager or Customer Service Center to determine:
• Tool Set Contents
• 36" or 54" platform
• Color choice
• Drawer configuration
• Casters/no casters
• Voltage 110V/230V
• Standard or extended warranty
• Administrative software, with or without remote HID scanner

Technical Support is just a phone call away!

AUTOMATION

LEVEL5™
Tool Control System

S EXCLUSIVE

An automatic tool control system that's as mobile as you are

It's no secret that the Snap-on Level 5™ Automated Tool Control System is the most comprehensive program of its kind in the industry. Using advanced digital imaging technology and proprietary software, ATC automatically keeps track of its inventory by user and records which tools are removed and replaced—all in real time. And now, you can take this revolutionary system where you need it, thanks to the new on-board rechargeable batteries. Moving ATC closer to the action improves productivity, saving time and money.

Features and Benefits

Rechargeable Batteries
Both 36-inch and 54-inch ATC platforms include 6 rechargeable, interchangeable batteries, providing up to 16 hours of battery life (two 8-hour shifts). The hot-swappable feature allows workers to easily replace an existing battery with a charged battery without impacting productivity.

Recharge Options
Batteries can be fully recharged in 3.5 hours using the internal charging system by plugging in the ATC. An optional, stand-alone battery charger is available which charges up to 6 batteries in 4 hours. Extra batteries are available individually or in a set of 6.

Safety and Protection
Snap-on rechargeable batteries feature state-of-the art circuit protection that prevents overload. For safety, the batteries will shutdown if they reach an upper heat limit, (well below critical stages) or if there is an accidental shortage.

Battery Monitoring
The ATC system monitors the batteries so you don't have to. A visual indicator shows discharge levels and the system verbally announces low battery levels. When batteries are critically low, the ATC system safely shuts down the system and all components.

Battery Tracking
Each battery is recorded in the ATC system by a serial number and is tracked like a tool. The ATC system records an event each time a battery is removed or replaced.

TOOL CONTROL

TOOL CONTROL

LEVEL5
Tool Control System ™

Selection Guide

How to Order

The Snap-on Level 5™ ATC system is delivered with your predetermined set of tools already installed in one of two basic platforms, 36" or 54". Each is offered in eleven color choices, three different drawer configuration options, with and without casters, and in 110V or 230V European power options. To order, work with your Snap-on Industrial Account Manager or Customer Service Center to determine:

Step 1 Tool Set Contents—pick the tools you need and we will lay out the drawer arrangements
Step 2 36" or 54" Platform—we'll help you pick the right platform based on the number of tools in your set
Step 3 Color Choice—pick one of eleven
Step 4 Drawer Configuration—pick one of three
Step 5 Casters—with or without, depending on mobility requirements
Step 6 Voltage—110V or 230V European
Step 7 Warranty—standard or extended
Step 8 Order Administrative Software, with Remote HID Scanner

TOOL MANAGEMENT

TAKE ATC TO THE NEXT LEVEL

Track Specific "Serialized, Certified and Calibrated" Assets such as torque wrenches, calipers & gauges with the ATC ZoomID Detection System. Tags are read/scanned and recorded by the ATC Box cameras like a barcode. Each adhesive tag has a unique color and number sequence. (65,000 unique tag codes available). Plus, get an immediate visual of your tool control status with the FastFlag Status Display Lights System. This add-on works with your existing ATC software to give you feedback in real time.

Status Light
Provides Visual Feedback, in Real Time

Red Light
Alert, Tools with Status, Wrong Tool, Bad Drawer Scan, Service Connection Lost

Yellow Light
Box Unlocked, Tools Issued

Green Light
All Tools Present, No Alerts, Box Locked

ATC ZoomID - Automated Tool Detection System

Color Barcoded Tags
L5TAG01J00A (212 Tags)
L5TAG01J20A (497 Tags)
L5TAG01J30A (1,587 Tags)
• Tags adhere directly to the tool, without interfering with the tools fit or function
• More Tag options available (see Tool Tag Catalog TL5TAG01J00A4)

Tag Reading Software (Sold per ATC box)
L5ZOOMIDL1 (1-year License)
L5ZOOMIDL3 (3-year License)
L5ZOOMIDL5 (5-year License)
• Uses current ATC hardware and software platform, version 1, V2 and V3
• Runs with ATC Admin Software Version 8.5.3.1 or higher
• Software is licensed per ATC tool box (ATC box serial number is required to activate)

ATC FastFlag Status Display Light System

LEVEL5ATC
Tool Control System ™

L5331J00APBO Level 5 ATC Locker

Automated Asset Management at the Speed of Work
• Fully networkable and scalable with other Level 5 ATC units; customizable reporting options
• Advanced RFID technology and proprietary software issues and records returns of Critical Industry workplace assets in real time
• Track irregularly shaped items like extension cords, tools kitted in plastic or fabric carrying cases, personal protective equipment and more
• Heavy duty metal shelves with foam bear the weight of larger tools and assets
• Track serialized items like torque wrenches, multimeters, micrometers, etc.
• Onboard current allows for secure recharging and storage of power tools
• Connects to Level 5 administrative interface with same look/feel of operation

ATC Locker Ordering and Install Process

1. Select Locker by Color and Location (NA/North America/US L5331J00AXXX, EU/Europe L5331J02AXXX)
2. Order Admin Software, One per Location L5A0298J11A includes card scanner
   • ATC Tool Storage software is the same at 8.2.1.0
   • If the customer already owns ATC boxes they DO NOT need to order new software, just update

3. Order RFID Starter Kit by Location (Domestic or International)
   • L5A0331J62B Domestic or L5A0331J63A International
   • Includes a variety of tags, adhesive and shrink tube
4. Optional (Highly Recommended)-RFID tag Reader 3-18906A North America or L5A0331J61A Europe
   • Installer will have one for initial install, customer will need one for future tag additions or tag replacements
5. ATC Install Techs will do initial set up of locker and item tagging

18 Inch All Weather Mobile Storage Chest

The most durable, most versatile, and most functional chest in its category. Its wider wheel base and telescoping handle makes for more stable and easier transport. Secure latching allows for better security, yet is easy to use. Accommodates up to 10 drawers, in 3 different sizes, for the greatest flexibility of tool storage. And of course, nothing can protect your tools better from the elements.

Fully Enclosed Ball Bearing Wheels On Wide Corners
• 22" wheel base improves stability during transport
• Can open the lid without having to flip the box over on its side
• Simple, fast field repair capability reduces downtime and frustration
• Solid rubber wheels absorb shock of rough surfaces

Four Bar Latches
• Prevents accidental opening
• Can be released with one hand
• Simple and secure
• Superior to swing latch offered on competitive cases

Telescoping Trolley Handle
• Comfortable for people between the 5th and 95th percentile height
• Extends to three positions: 36", 39" and 43"
• Competition has only one position

Cover Swings Open On Top and Can Be Used As a Seat
• Made possible by durable butterfly hinges with stainless steel hardware
• Passivated stainless steel resists corrosion in harsh environments

Drawers Fully Extend on Snap-On's Proprietary, Composite Slides and Rails
• Loaded drawers extend fully so the entire contents of the drawer may be easily viewed
• Two drawer sizes 1-1/4" & 2-3/4"

Meets/Exceeds Applicable Standards
• MIL 810 Environmental Resistance and Performance
• MIL 1916 Quality Standard

LASER ENGRAVERS

LASV10W Laser Engraver

The LASV10W System is the latest in cutting-edge fiber laser technology for industrial laser marking/ ID/traceability applications. Characteristic of this laser system is the excellent beam quality necessary for marking/engraving a broad range of materials. This system requires no chemicals during use, simplifying operations and eliminating the need for potentially hazardous materials and special handling. No MSDS is necessary.

• Best results on any metal: steel, titanium, aluminum (bare, anodized or coated), as well as plastics (such as ABS, Lexan,PES, PET, PVC), polycarbonate and more.
• Applications include tool, automotive, aerospace, medical device, electronic, semiconductor, jewelry corporate awards, firearms manufacturing and many more.

Benefits of the LASV10W system include:

• High speed, high quality marking/engraving
• User friendly software and hardware
• Serialization, 1D & 2D barcode generation (including UID)
• Compact modular design
• Robust and flexible enclosure/workstation
• Low cost of ownership
• No maintenance
• Completely air cooled
• Low power consumption: 90 – 240 VAC
• 2 year warranty
• On-site set-up and training included

Accessories

Stock No.	Description
LASV10W-PD	Pneumatic door for enclosure - Must be specified at time of original order
LASV10W-MB	Mobile base with lockable casters and monitor arm
LASV10W-FE	Trolley-style 110VAC fume extractor
LASV10W-PC	AC Power conditioner
LASRING.DIV	Rotary Stepper

All units work on both 110 and 230 Volts, 50/60 Hz

• Snap-on Industrial follows a policy of continuous product improvement.
• Specifications are subject to change without notice.
• LASV10W is a class 4 laser source. Laser interaction with organic or inorganic material can cause TOXIC FUMES and PARTICLES.
• The operator shall provide interlocks, indicators and other appropriate safety features, in full compliance with 21 CFR 1040 and/or other applicable national and local regulations.

TOOL STORAGE SYSTEMS

One Drawer at a Time

Safety At Your Fingertips

Snap-on® Drawer Control is an interlocking mechanism that prevents you from opening more than one drawer at a time in each drawer bank. This valuable safety feature helps prevent fully loaded roll cabs from tipping over.

Drawer Control is available for all Snap-on Masters Series products. Call your Snap-on Industrial sales representative for additional information.

How It Works

What makes Drawer Control work? A special interlocking mechanism connects all drawer slides within a given drawer bank. When one drawer is opened the interlocking shaft locks all the other drawer slides in the drawer bank, preventing them from opening. When all drawers are closed, the special interlocking mechanism releases all the drawer slides, allowing you to open any single drawer in the drawer bank. Smart AND safe.

Easy To Order.

STANDARD UNITS with One-Drawer-at-a-Time Feature

Other boxes and colors available through Industrial Customer Service Center

You can order this feature on all new Snap-on Masters series roll cabs and top chests. To order Drawer Control, simply contact our Industrial Customer Service Center (ICSC).

When all drawers are closed the special interlocking mechanism releases the drawer slides, allowing you to open any single drawer in the drawer bank.

When one drawer is opened the special interlocking mechanism connects the remaining drawer slides, preventing them from opening.
